Apart from the neat narrow fillers, the full width of the room is used for the wardrobe storage.

Known as a curtain box, only truly made to measure bedroom furniture allows for a precise gap to be left for blinds or curtains.

Angled to perfection even the design on the door compliments the slope of the ceiling.

Sturdy 18mm bases to all drawers for maximum strength.

“truly made to measure”

There is an important point regarding the claim that many manufacturers make about their furniture being made to measure. Often doors of a standard dimension are used; the bedroom can then only be planned using these “set” sizes of doors. Therefore wide fillers are needed to plug the gaps; consequently valuable storage space remains unused.

We meticulously make each door and furniture component to fit precisely in your bedroom, all fillers are kept to a minimum yet practical size. For all awkward areas and sloping ceilings, doors are made to a precise measurement thereby giving a fully fitted look to your bedroom.

choice & flexibility

The last thing you want to be told when you are choosing your bedroom furniture is that you cannot have “that” colour in “that” design. Most bedroom furniture manufacturers are unable or unwilling to give you just what you want. They are inflexible! We can offer you 21 choices of colour, 21 choices of door design and 21 choices of handles and you can have any design with any of the colours.
